

NORTH AMERICAN PLYWOOD CORPORATION

Save time and money with NAPC's Baltic Birch premade drawer sides. These precisely made drawer sides have 30% more plies than domestically produced drawer sides. This produces a drawer side with virtually void free construction, excellent machinability and dimensional stability. Baltic Birch drawer sides are made for extended life to endure heavy loads.

Prefinished drawer sides are coated on both sides with our durable UV clear coat. This tough topcoat resists scratching and saves material and labor costs associated with in-house finishing. The unfinished drawer sides are fine sanded so they are ready to receive your preferred finish or stain.
